

HAVE YOU BOOKED YOUR FLU VACCINE YET?

Following a year of lockdowns and social distancing, our immunity to flu is likely to be lower, leading to possible higher flu cases and an increase in hospital admissions this autumn. It is therefore more important than ever before to make sure you receive the flu vaccine this year.

Last year, we experienced a shortage of flu vaccinations across the UK. At the Doctors Clinic Group we are here to help you with our dedicated flu vaccination services.

How can The Doctors Clinic Group help:

Flu Vouchers: It's not always possible for your employees to attend an on-site vaccination clinic, employees simply take a paper or digital voucher to a local retailer, where a trained nurse or pharmacist will administer the vaccine.

On-site flu vaccinations: Flu vaccinations at work by fully qualified nurses on a date and time to suit you.

Online booking: Easy online booking allows your employees to book their timeslot in advance, with appointments confirmed directly with employees by email and text.

Wellness content: We provide information about the flu virus that can be shared with your employees as well as posters about the upcoming flu jab date.

Aftercare service: We also have a dedicated email for post-vaccination queries and advice.

For more information on our services and pricing, please get in touch with our [sales team](#).
